PROFESSIONAL SUMMARY

Senior Product Designer with a proactive and autonomous approach to leading end-to-end design processes, from wireframing and user testing to final execution. I possess a solid technical foundation that allows me to engage in effective dialogue with engineering teams, ensuring seamless integration and scalability. My process is deeply rooted in analyzing metrics and continuous iteration to refine products and reach the most effective solutions. I specialize in building scalable design infrastructure and internal management tools, acting as a strategic bridge between business objectives and technical feasibility.

CORE COMPETENCIES

Design Strategy: Product Strategy, UX/UI Design, Design Systems, Strategic Vision
Analytical & AI: AI Data Insights, Data Synthesis, Metrics-Driven Design, Strategic Mapping
Technical & Motion: Motion Design, Micro-interactions, Vibe Coding, Accessibility (WCAG), HTML/CSS handoff
Tools: Figma, Lottiefiles, Adobe Suite, Hotjar, Notion, Miro
Project Management: Agile, Strategic Governance, Technical Liaison

EXPERIENCE

DETECTA SECURITY -- Product Designer
June 2024 – Present

- End-to-end redesign of Android mobile app (Centaurus 2.0): offline-first architecture, hands-free voice commands, push notifications and Lottie micro-interactions. Result: -120 monthly hours in manual review, 98% event registration accuracy, +45% NPS improvement among field operators.
- Designed web SaaS monitoring console replacing fragmented ecosystem (WhatsApp + Excel) with unified platform featuring telemetry, VoIP and automated emergency protocols. Result: 15 min average report time vs. 25 min SLA, 100% auditable compliance.

- Led control tower unifying 300+ GPS account APIs into a single hub. Result: estimated 80% reduction in incident detection time.
- Design system with design tokens, dark mode and WCAG AA accessibility applied across all 3 products.

BELOG IT -- Product Designer
February 2023 – April 2024

- I led the architecture of a comprehensive internal management system and 6 web applications from scratch, establishing a robust Design System that enabled each product to feature its own distinct color identity while maintaining full aesthetic alignment with the core brand.
- I integrated strategic micro-interactions to reinforce user actions and improve task feedback, ensuring that diverse applications felt like a unified, high-performance ecosystem despite their individual visual differences.

FIERA STUDIO -- UX/UI & Motion Designer
May 2021 – November 2022

- Spearheaded end-to-end digital transformation projects for multiple clients, modernizing complex manual workflows into streamlined digital experiences through research, UX, and UI design. I engineered scalable interfaces that aligned product capabilities with business growth objectives, integrating strategic micro-interactions to ensure a modern and cohesive user experience.

EDUCAEDU -- Web Content & UI Design
November 2017 – May 2021

- Designed interfaces and visual content for educational institutions to drive course lead generation. Result: +20% increase in enrollments through UI improvements and content strategy applied to course landing pages.

POTENCIAL DIGITAL -- Junior Web Designer
July 2015 – November 2017

- Orchestrated the digital transformation for businesses with no prior online presence by developing responsive Bootstrap websites, transforming their visibility and driving a direct increase in sales through modern, brand-aligned digital experiences.

EDUCATION & CERTIFICATIONS

Postgraduate in Project Management -- Universidad Tecnologica Nacional (UTN), 2023
Diploma in UX and Accessibility -- Universidad Tecnologica Nacional (UTN), 2019

Graphic Design Degree -- Universidad de Buenos Aires (UBA), 2018
AI for Designers -- Nelson Rodriguez-Pena, 2024
Metrics and Design -- Sol Mesz, 2024
Product Designer -- Sol Mesz, 2022
English -- Centro Universitario de Idiomas (CUI), 2022
